### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Town Board has reviewed the proposed modification of the Zoning Map Modification and determines that it does not have any impact on the environment. The subject area, which is limited in size, was previously zoned Hamlet under the prior Zoning Ordinance that became effective on January 1, 2019 and its return to Hamlet Zoning from Conservation will not create any hardships or significant impacts. The property is already developed to a large extent and changing classifications to a long lasting designation will merely permit but not require any change in use. Based on the review of other agencies approving the minor modification of the Ordinance, and the lack of any significant impacts, the Board determines below as follows:

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.  Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
